

SPECIMEN LABEL

NOT A PLANT FOOD PRODUCT

INOCULANT FOR PEANUTS

Bradyrhizobium sp. (Arachis)

GUARANTEE

PRODUCT NUMBER: 1204
NET WEIGHT: 18 KG (40 LB)

This inoculant contains a minimum of 100 million (1 x 10⁸) viable cells of *Bradyrhizobium sp (Arachis)* per gram.

- This product is a culture of nodule-forming, nitrogen-fixing bacteria which gather free air nitrogen and make it available to the plant.
- Applies easily through standard insecticide hoppers.
- Injects massive numbers of bacteria directly into the soil as you plant.
- Separates bacteria from direct contact with chemical seed protectants.
- An essential part of your program to increase yields – profitably.
- Store flat until ready to use.

DIRECTIONS FOR USE

Soil Implant+ inoculant is different from granular pesticides in that it has a high moisture content. This is essential for bacteria survival. For best performance, read and follow these directions for use:

1. **Prepare application equipment:** Clean insecticide hopper, rotor and calibration mechanism thoroughly before filling. Remove all leftover insecticide. Clean the feeding mechanism before calibrating. Adjust flexible tubing from hopper to planting shoe so that it is as straight and vertical as possible. Fill large box only ¼ full.
2. **Determine application rate:** Soil Implant+ should be applied in-furrow at the rate of 6 ounces per 1000 feet of row (170 grams per 300 meters of row).
3. **Calibrate equipment** before each use. Follow calibration instructions supplied by the equipment manufacturer. Set controls at a larger opening and adjust down to give the desired application rate of 170 grams per 300 meters of row (6 ounces per 1000 feet of row).

Metric System: To apply at the rate of 170 grams per 300 meters of row, calibrate equipment to place 7.1 kilograms per hectare in 0.8 metre rows, at 8 kilometers per hour. Adjust equipment down only a small amount at one time – then try. NOTE: 250 ml of Soil Implant+ inoculant weighs approximately 190 grams. If planting in other than 0.8 metre rows, use the following table to determine the amount of Soil Implant+ inoculant required per hectare:

Row Width (Metres)	1.1	1.0	0.9	0.8	0.7	0.6	0.5	0.2
Kilograms per Hectare	5.2	5.7	6.3	7.1	8.1	9.5	11.4	28.5

US Customary System: To apply at the rate of 6 ounces per 1000 feet of row, calibrate equipment for 6.5 pounds per acre in 30-inch rows at 5 miles per hour. Adjust equipment down, only a small amount at one time – then try. NOTE: One heaping cupful of Soil Implant+ inoculant weighs approximately 6 ounces. If planting in other than 30-inch rows, use the following table to determine the amount of Soil Implant+ required per acre:

Row Width (Inches)	40	38	36	32	30	28	24	22	7
Pounds per Acre	5.0	5.0	5.5	6.0	6.5	7.0	8.0	9.0	28.0

4. NOTE: Some growers have increased yields by using application rates in excess of 170 grams per 300 meters of row. There is no danger in using heavy doses of Soil Implant+ inoculant. **A 2X application rate is advisable under adverse planting conditions and on land not previously planted to this legume.**
5. Do not fill hoppers until you get to the field. Remove all unused Soil Implant+ inoculant from hoppers at completion of day's work. Do not allow to remain in hoppers overnight.

PRECAUTIONS

- Store in a cool, dry place and keep bag tightly closed. Store flat.
- Use before expiration date.
- Do not mix with fertilizer.
- Do not band this material. It must be applied in the furrow.

FLOWABILITY

1. Soil Implant+ flow may be affected by humid conditions. Clean rotor and adjustable opening often to ensure good flow. See limited warranty below.
2. Do not use Chemical-Saver meter roller on John Deere MaxEmerge[®] Plus planters. Remove system while Soil Implant+ is being used.

CAUTION:

Avoid prolonged or repeated skin contact or inhalation of dust. Recommend wearing of dust mask, safety glasses and protective gloves.

LIMITED WARRANTY

EMD Crop BioScience Inc. (or EMD Crop BioScience Canada Inc., dependent on which entity is the seller of this product) (the seller of this product is referred to herein as "EMD") guarantees that this product conforms to its label description and is suitable for its intended use if stored and used strictly in accordance with label directions under normal conditions of use. EMD, through its distributors, must be notified of any field performance complaint within seventy (70) days after planting. EMD's sole obligation under this warranty shall be to refund the purchase price. EMD SHALL NOT BE LIABLE FOR AND DISCLAIMS ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES WHATSOEVER. Without limiting the foregoing, EMD shall not be responsible for loss or partial loss of crop from any cause whatsoever. EMD SHALL NOT BE SUBJECT TO ANY OTHER OBLIGATIONS OR LIABILITIES, WHETHER ARISING OUT OF BREACH OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR OTHER THEORIES OF LAW. THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER REPRESENTATIONS AND WARRANTIES, EXPRESS OR IMPLIED, AND SELLER EXPRESSLY DISCLAIMS AND EXCLUDES ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PURPOSE.

THE ABOVE LIMITED WARRANTY IS VOID WHERE PROHIBITED BY LAW.
